Dodie Smith's 1956 novel, *The Hundred and One Dalmatians*, laid the foundation for the Disney classic. Smith's writing, imbued with wit and charm, presented a captivating tale of canine companionship and adventure. While the Disney adaptation took significant liberties, it retained the core elements of the story: the resourceful Dalmatian parents, the villainous Cruella de Vil, and the daring escape of the puppies. Smith's novel, with its detailed descriptions of London life and the endearing personalities of the animals, provided a rich tapestry upon which Disney built its animated masterpiece. The novel's influence is evident in the film's overall tone and character development, showcasing how a strong source material can shape a cinematic adaptation. Comparing the book and the film reveals interesting choices made by Disney, highlighting both their faithfulness to the spirit of the original and their creative deviations.

Chapter 2: Animating the Spots: The Making of the Disney Classic

The 1961 Disney adaptation of 101 Dalmatians marked a significant moment in animation history. The film's distinctive animation style, employing a limited color palette and a simpler approach compared to earlier Disney productions, proved incredibly effective. This "xerography" process, a new technique for transferring images onto cels, streamlined the animation process, saving time and resources, allowing for a more expressive and fluid style. The film's artistic choices, from the character designs to the background visuals, contribute to its unique charm and enduring appeal. The distinct artistic choices, coupled with the compelling narrative, contributed to the film's success.
