H2: Chapter 1: Origins & Migration – The Diverse Pathways to India

The arrival of people of African descent in India wasn't a single event but a series of migrations and historical shifts. The most significant factor is the transatlantic slave trade, with some Africans brought to India via Portuguese and Arab traders, finding themselves in various roles within the burgeoning colonial settlements. However, this was not the only pathway. There were also instances of voluntary migration, with individuals coming to India for trade, work, or seeking refuge. Furthermore, intermarriage between African individuals and local populations played a significant role in shaping the genetic and cultural landscape. The Sidi community in Gujarat, for instance, has a rich history tracing back centuries, showcasing the diverse routes that led to their presence in India.
