Introduction: Setting the Scene - San Francisco in 1965

San Francisco in 1965: A City on the Cusp of Change

1965 in San Francisco was a year of contrasts. The city, still recovering from the economic downturns of earlier decades, was experiencing a surge in population, fueled by both internal migration and the influx of people drawn to its unique cultural landscape. The post-

war economic boom was in full swing, but the seeds of social and political upheaval were already being sown. The optimism of the early 1960s was starting to give way to a growing sense of unrest, particularly among young people who were challenging traditional values and demanding social justice.

Market Street, the city's main thoroughfare, reflected this duality. Grand department stores like Macy's and The Emporium stood alongside smaller, independent businesses, representing a blend of old and new. The street's architecture, a mix of Victorian-era buildings and more modern structures, reflected the city's layered history.
