The digital age has revolutionized communication, shrinking the world and connecting billions. Yet, paradoxically, many feel more isolated than ever before. This introductory chapter explores this seeming contradiction. We examine how technology, while offering unprecedented opportunities for connection, can also foster superficial interactions, hindering the development of genuine intimacy. We'll explore the rise of social media and its impact on self-esteem, the feeling of "FOMO" (fear of missing out), and the pressure to present an idealized version of oneself online, leading to a sense of inadequacy and disconnect.
