Storyline/Structure:

The book unfolds as a blend of historical fiction and fantastical adventure. Annie Jump Cannon, a real-life pioneering astrophysicist, is our protagonist. While working at the Harvard Observatory in the early 20th century, Annie stumbles upon a hidden, encrypted section within the observatory's archives. This leads her to a "Library of Heaven," a celestial realm accessible only through a powerful telescope and specific astronomical alignments. This library contains holographic records of past civilizations, extinct species, and lost knowledge – all organized by celestial events and connected to the broader cosmic history of the universe.

The story will be structured chronologically, intertwining Annie's personal journey with her exploration of the Library. We see her grapple with sexism within the scientific community, her struggle to get credit for her groundbreaking work on stellar classification, and her growing understanding of the immense implications of the Library's contents. She encounters both benevolent and malevolent entities within the Library, testing her intellect and courage. The climax involves a choice – whether to share her discovery with the world, risking misunderstanding and potential misuse of the knowledge, or to keep it secret, safeguarding it from those who might exploit it.
