Book Concept: Avril ou le Monde Truqué (Avril or the Rigged World)

Logline: A disillusioned journalist uncovers a vast conspiracy that manipulates global events, forcing her to question everything she thought she knew about reality and fight for the truth in a world where nothing is as it seems.

Storyline/Structure:

The novel follows Avril, a sharp, investigative journalist who stumbles upon a seemingly innocuous detail while researching a seemingly unrelated story. This detail unravels a complex web of deceit, revealing a clandestine organization subtly controlling major global events – from political upheavals to economic crises, even seemingly random acts of violence. The organization uses advanced technology and psychological manipulation to maintain its control, creating a "rigged world" where the truth is buried beneath layers of deception.

The narrative unfolds in a non-linear fashion, alternating between Avril's present-day investigation and flashbacks revealing the organization's history and methods. Each chapter focuses on a specific aspect of the conspiracy, gradually building the suspense and unveiling the organization's true nature and ultimate goals. Avril's journey is fraught with danger as she faces powerful enemies who will stop at nothing to silence her. The climax involves a high-stakes confrontation, where Avril must use her wits and courage to expose the truth to the world and dismantle the organization's control. The ending leaves the reader pondering the nature of reality and the power of truth in a world increasingly susceptible to manipulation.
